Annual Index

Volume 33, 2001

January 1–93
April 95–194
July 195–290
October 291–372

Approximation for the Rank Adjacency Statistic for Spatial Clustering with Sparse Data, An, J. P. Ekwaru and S. D. Walter, 29–39

Arentze, Theo A. *See* Joh, Chang-Hyeon

Ballas, Dimitris, and Graham P. Clarke, The Local Implications of Major Job Transformations in the City: A Spatial Microsimulation Approach, 291–311

Clarke, Graham P. *See* Ballas, Dimitris

Classification Analysis of World Economic Regions, Raymond J. Dezzani, 330–52

Concentration Effects, Spatial Mismatch, or Neighborhood Selection? Exploring Labor Market and Neighborhood Variations in Male Unemployment Risk, Using Census Microdata from Great Britain, Edward Fieldhouse and Mark Tranmer, 353–69

Dezzani, Raymond J., Classification Analysis of World Economic Regions, 330–52

Dynamic Models in Space and Time, J. Paul Elhorst, 119–40

Ekwaru, J. P. and S. D. Walter, An Approximation for the Rank Adjacency Statistic for Spatial Clustering with Sparse Data, 29–39

_____ , Power of the Rank Adjacency Statistic to Detect Spatial Clustering in a Small Number of Regions, 19–28

Elhorst, J. Paul, Dynamic Models in Space and Time, 119–40

Estimating the Variability of Active-Layer Thaw Depth in Two Physiographic Regions of Northern Alaska, Claire E. Gomersall and Kenneth M. Hinkel, 141–55

Exploring Spatial Process Dynamics Using Irregular Cellular Automaton Models, David O'Sullivan, 1–18

Fieldhouse, Edward, and Mark Tranmer, Concentration Effects, Spatial Mismatch, or Neighborhood Selection? Exploring Labor Market and Neighborhood Variations in Male Unemployment Risk, Using Census Microdata from Great Britain, 353–69

Fotheringham, A. S., C. Brunsdon, and M. Charlton, *Quantitative Geography: Perspectives on Spatial Data Analysis*, reviewed, 370–72

Gomersall, Claire E., and Kenneth M. Hinkel, Estimating the Variability of Active-Layer Thaw Depth in Two Physiographic Regions of Northern Alaska, 141–55

Guldmann, Jean-Michel, and Hag-Yeol Kim, Modeling Air Quality in Urban Areas: A Cell-Based Statistical Approach, 156–80

Hinkel, Kenneth M. *See* Gomersall, Claire E.

Huang, Haiying. *See* Kolaczyk, Eric D.

Jackson, Randall W., and Michael Sonis, On the Spatial Decomposition of Forecasts, 58–75

Joh, Chang-Hyeon, Theo A. Arentze, and Harry J.P. Timmermans, Multidimensional Sequence Alignment Methods for Activity-Travel Pattern Analysis, 247–70

K-Function Method on a Network and Its Computational Implementation, The, Atsuyuki Okabe and Ikuho Yamada, 271–90

Kim, Hag-Yeol. *See* Guldmann, Jean-Michel

Kolaczyk, Eric D., and Haiying Huang, Multiscale Statistical Models for Hierarchical Spatial Aggregation, 95–118

Local Implications of Major Job Transformations in the City, The: A Spatial Microsimulation Approach, Dimitris Ballas and Graham P. Clarke, 291–311

Location-Specific Cumulative Distribution Function (LSCDF): An Alternative to Spatial Correlation Analysis, David W.S. Wong, 76–93

Mikelbank, Brian A., book review, 370–72

Modeling Air Quality in Urban Areas: A Cell-Based Statistical Approach, Jean-Michel Guldmann and Hag-Yeol Kim, 156–80

Multidimensional Sequence Alignment Methods for Activity-Travel Pattern Analysis, Chang-Hyeon Joh, Theo A. Arentze, and Harry J.P. Timmermans, 247–70

Multiscale Statistical Models for Hierarchical Spatial Aggregation, Eric D. Kolaczyk and Haiying Huang, 95–118

Okabe, Atsuyuki, and Ikuho Yamada, The *K*-Function Method on a Network and Its Computational Implementation, 271–90

On the Spatial Decomposition of Forecasts, Randall W. Jackson and Michael Sonis, 58–75

O'Sullivan, David, Exploring Spatial Process Dynamics Using Irregular Cellular Automaton Models, 1–18

Power of the Rank Adjacency Statistic to Detect Spatial Clustering in a Small Number of Regions, J. P. Ekwaru and S. D. Walter, 19–28

Quantitative Geography: Perspectives on Spatial Data Analysis, by A. S. Fotheringham, C. Brunsdon, and M. Charlton, reviewed, 370–72

Reevaluating the Relationship between In-, Out-, and Net Migration for Nonmetropolitan Counties: An Alexander C. Vias, 228–46

Rey, Sergio J., Spatial Empirics for Economic Growth and Convergence, 195–214

Rogerson, Peter A., A Statistical Method for the Detection of Geographic Clustering, 215–27

Sadahiro, Yukio, Spatiotemporal Analysis of Surface Changes by Tessellations, 312–29

Sadahiro, Yukio, and Kentaro Takami, A Statistical Method for Analyzing the Relative Location of Points in a Bounded Region, 40–57

Sonis, Michael. *See* Jackson, Randall W.

Spatial Empirics for Economic Growth and Convergence, Sergio J. Rey, 195–214

Spatiotemporal Analysis of Surface Changes by Tessellations, Yukio Sadahiro, 312–29

Specification of the World City Network, Peter J. Taylor, 181–94

Statistical Method for Analyzing the Relative Location of Points in a Bounded Region, A. Yukio Sadahiro and Kentaro Takami, 40–57

Statistical Method for the Detection of Geographic Clustering, A. Peter A. Rogerson, 215–27

Takami, Kentaro. *See* Sadahiro, Yukio

Taylor, Peter J., Specification of the World City Network, 181–94

Timmermans, Harry J.P. *See* Joh, Chang-Hyeon

Tranmer, Mark. *See* Fieldhouse, Edward

Vias, Alexander C., Reevaluating the Relationship between In-, Out-, and Net Migration for Nonmetropolitan Counties: An Update on Beale's U-Shaped Curve, 228–46

Walter, S. D. *See* Ekwaru, J. P.

Wong, David W.S., Location-Specific Cumulative Distribution Function (LSCDF): An Alternative to Spatial Correlation Analysis, 76–93

Yamada, Ikuho. *See* Okabe, Atsuyuki
